About Me

Frontend Developer with hands-on experience building real-world applications for iOS, Android, and Web using React and React Native. Focused on creating clean, reliable, and user-friendly products, with experience in real-time features, dashboards, authentication systems, and complex app flows. Used to working on live products in fast-moving startup environments.

Education

Bachelor of Computer Science and Engineering - 2022

UBT - University for Business and Technology | Prishtina

Skills

TECH STACK

- React.js / Next.js / Vue.js
- React Native (Expo)
- Swift
- Kotlin
- TypeScript / JavaScript
- Redux Toolkit
- Tailwind / Bootstrap
- HTML5 / CSS3

OTHER

- REST APIs
- Firebase / Notifications
- Git
- Figma → UI Implementation
- Google Maps API
- OCR Integration
- AI Tools

PROFESIONAL SKILLS

- Reliable
- Organized
- Team Player
- Creative
- Motivated

Experience

Bbros - Prishtine

April 2023 - Present

KosGo - Ride Sharing Platform

React Native (Expo) - iOS & Android

Built a full-featured ride-hailing platform connecting drivers and riders in real time.

Key contributions:

- Implemented live GPS tracking using Google Maps API
- Built real-time trip lifecycle (request → accept → in progress → completed)
- Developed in-app chat and calling system
- Integrated push notifications for ride events
- Built multi-role architecture (driver, rider, admin)
- Implemented earnings dashboard and rating system
- Added dark/light mode and multi-language support

ATK Lotaria - OCR Lottery App

React Native / React.js - Web, iOS & Android

Developed a national-level application enabling users to scan fiscal receipts and participate in digital lottery draws.

Key contributions:

- Integrated OCR scanner for automatic receipt recognition
- Built receipt history and statistics dashboard with charts
- Implemented advanced search and pagination
- Developed complaints and feedback system
- Built full authentication and user profile management
- Optimized performance for fast scanning and data processing

Shelfie - Task Management & Field Tracking Platform

React.js - Web

Developed a full-stack platform for managing field employees, schedules, and territories.

Key contributions:

- Built admin dashboard with real-time location tracking via WebSockets
- Integrated interactive maps and route history visualization with Leaflet
- Implemented JWT-based role authentication and protected routes
- Added schedule management with check-in/check-out tracking
- Developed automated task notifications and Excel report exports
- Created analytics dashboards for data-driven insights

Prona Scout - Real Estate App

React Native - iOS & Android

Mobile real estate application synchronized with a web platform for seamless property browsing.

Key contributions:

- Built dynamic property listing system with detailed pages
- Implemented advanced filters and search
- Developed saved properties and user profiles
- Optimized mobile UX for large datasets
- Ensured synchronization with web platform

Courses

December 2022 – January 2023

Beetroot Academy – Prishtine

Advanced JavaScript

February 2022 – June 2022

Beetroot Academy – Prishtine

Front-End Development

February 2019 – April 2019

Bonevet – Gjakove

Ruby on Rails

Languages

Albanian – Native Language

English

Experience

Macintoks – E-commerce Platform

React.js – Web

Developed a modern online retail platform for electronics and accessories with full user and admin functionality.

Key contributions:

- Built product catalog with filtering and search
- Implemented shopping cart and multi-step checkout
- Developed admin dashboard for inventory and orders
- Integrated responsive UI and interactive components
- Connected to REST APIs and managed state with Redux

Autoshkollaime – Driving School App

React Native – iOS & Android

Led the complete rebuild of version 2, redesigning UI and internal architecture for better performance and user experience.

Key contributions:

- Rebuilt the app from scratch for improved speed and stability
- Fixed critical bugs in login and payment flows
- Developed learning and testing system for driving exams
- Integrated push notifications for reminders
- Built admin dashboard for user management and revenue analytics

Comandante Marcos – Restaurant Reservation System

React.js – Web

Reservation system for managing tables, reservations, and staff schedules.

Key contributions:

- Built drag-and-drop table management system
- Implemented real-time reservation availability
- Developed role-based authentication
- Built advanced search and filters
- Designed visual floor planning interface

Pabau – Prishtine

July 2022 – September 2022

React Intern

- I created the API with GraphQL and populate the database in the seed files, where that data is then called in the Front-End part by adapting to figma.
- Testing and bug fixing to improve the quality of project.
- Collaborate with other developers to design, build and maintain the project.
